

WASHINGTON, D.C. 20505

4 September 1975

Mr. Jerry Brimmer
Room 7234A
Department of State
Washington, D. C.

Dear Jerry:

Here is the Bayes analysis I mentioned in our session last Friday. I am also sending along some examples of other high-quality analytical papers; the Secretary may already have read one or more of these. If you are interested in talking about them or in arranging to get further studies of this kind, I suggest that you give a call to my good friend at the Agency, [redacted] who is Deputy Director of the Office of Political Research. You can reach him on 143-5703.

Thanks again, Jerry, for your insights and enlightening conversation.

Sincerely,

25X1A

Conv. w Brimmer 19 Sept.

- 205M + 305M are the kind he thinks HAK would be interested in. he will try them on HAK + let me know. he thought a bit specialized for HAK.
- Bayez not so much^{was}. HAK wouldn't care much what diff analysts thought. Might be better if a trend showed and there were analysis added.
- HAK especially interested in things with econ ~~trend~~ thrust these days.
- Brimmer encouraged sending of papers like these noted above.
